

# Syllabus

## Color Pencil Two ~ Class One

- A. All tools used in previous classes are needed in CP2.
- B. The addition of “Solvent” in the building process of a picture will be introduced to your mix of tools, along with brushes..

Eco-House solvent is the solvent that I personally use most. This does not mean it is the safest, as all are TOXIC to some degree, but it is equal to Zest-It made in England. Both are Natural Products Xtra Mild and Citrus Thinner.

Eco-House is available through Blick, Amazon, and a number of other shipping points. Zest-It is British and only EBay has it.

You do not need large quantities of this product. A smaller container will be quite enough for your needs.
