Cultivate on the Road

Bringing STEM to your campus!

HUNTSVILLE BOTANICAL GARDEN

Cultivate
GROWING STEM EDUCATORS

Hands-on, plant science and literacy-based lessons designed to inspire your students presented to your team on your campus.

We're excited to bring Cultivate directly to school administrators and teachers at their campuses. This program is available for professional development days or during faculty meetings—and best of all, it's completely **FREE** to book!

Our Cultivate on the Road program delivers hands-on, standards-based STEM curriculum focused on plant and environmental science. The session includes a bin of ready-to-use STEM materials so teachers can easily implement the lessons in their classrooms. We also lead a walking tour around your campus to inspire educators to connect plant science with the natural environment right outside their doors.

Program Requirements:

- Must be in the state of Alabama.
- Must be within a 100-mile radius of the Huntsville Botanical Garden
- Must have a minimum of 15 participants.

Contact **cultivate@hsvbg.org** or 256-830-4447 ext. 270 to schedule your preferred session date at your campus today.

Visit the **Cultivate** webpage to receive more information about this mission-driven initiative led by environmental education organizations across our state and view upcoming sessions at Huntsville Botanical Garden.

Funding for this program is provided by the State of Alabama Legislature with additional support from The Daniel Foundation of Alabama, Toyota Motor Manufacturing of Alabama, Mazda Toyota Manufacturing, and other philanthropic assistance.
